Dear Mr. Beckman,

Thank you for the explanation regarding the timing of correspondence distribution.

However, your suggestion that we simply wait to submit "eComments" once the agenda is published is not an acceptable solution, given the Planning Department's recent handling of public in

The Failure of the eComment Process (DRC Meeting 11/19/25): For the Design Review Committee meeting on November 19, multiple neighbors submitted detailed, written eComments only to have those detailed objections to a single, sanitized sentence.

Mr. Agbayani stated verbatim:

"Four parties submitted public comments electronically through the eComment function on the City website. Concerns were generally related to mass and scale of the building traffic an

This generic summary failed to convey the specific evidence provided regarding safety risks, tree removal, and incompatibility.

My Questions to You:

1. **Did the DRC members actually read the full text** of those submitted eComments, or did they vote based solely on the Planner's verbal summary?
2. **Why have these eComments been deleted from the public record?** When visiting the City of Orange Meeting Calendar today, the public comments for the 11/19/25 meeting are no

Procedural Demand for Planning Commission: Because the "summary" method effectively silenced our concerns at the DRC, I cannot rely on the standard eComment process for the Plar

I formally request the following:

1. That **all written correspondence** (including this email chain and previous opposition letters) be provided to the Planning Commissioners as **full-text attachments** in their agenda pack
2. That the "missing" eComments from the 11/19/25 DRC meeting be restored to the public website immediately to ensure a complete administrative record.

Please confirm that you will honor the request to provide full-text copies of our opposition to the Commission.

Regards,

Kevin Neu 2489 N Hartman Street

Good Afternoon Kevin,

Thank you for reaching out.

I am confirming that staff is in receipt of this and multiple other related comments regarding the pending project at 2411 N Glassell.

Please be advised, however, that at this time this project has not yet been scheduled for a public hearing. Once an agenda is published for a public hearing, the community will have the opportunity to provide comments, which will be a) formally included in the public record for that item.

Please see the screenshot below from the City's Legistar webpage (<https://cityoforange.legistar.com/Calendar.aspx>), where you can sign up for both email updates for future agenda public

Subject: OPPOSITION to Major Site Plan Review No. SP-1180 (2411 N Glassell St)

Mr. Beckman,

Please confirm receipt of this email and verify that this correspondence will be distributed to all Planning Commissioners as part of the public record for the upcoming hearing

Date: January 23, 2026 **To:** The Chair and Members of the City of Orange Planning Commission **From:** Kevin Neu, Homeowner (2489 N Hartman Street) **Re: OPPOSITION to Major Site I**
Honorable Chair and Commissioners,

I am the **homeowner and resident at 2489 N Hartman Street**, located directly across the intersection from the project's proposed heavy-truck exit.

I am writing to formally oppose the proposed logistics facility at 2411 N. Glassell Street as currently designed. While I support economic development, this project attempts to squeeze a high residential receptors.

I request that you review the following **six critical defects** in the proposal and demand they be remedied before considering approval.

- 1. Material Misrepresentation of Environmental Impacts (Tree Removal)** There is a substantial discrepancy between the applicant's public testimony and their technical reality regarding
 - The Testimony:** During the Design Review Committee meeting on November 19, 2025 (Design Review No. 5154), Erik Peterson (Landscape Architect, CDPC) stated on the record I
 - The Fact:** This claim is false. **Page 29 of the applicant's own Arborist Report** explicitly states:

"Forty-three (43) out of the (94) Aleppo pine trees; including the (1) tree belonging to the City of Orange trees, are expected to be removed due to the construction of the reta

- The Impact:** Removing 43 out of 94 trees results in a retention rate of only **54%**, not the "80-90%" promised to the Design Review Committee. The Commission cannot base its decis filtration.

- 2. Public Health & Safety: AB 98 Violation & Toxic Exposure to Children** The project design mandates a "Right Turn Only" exit onto Glassell. This forces 100% of heavy diesel trucks to bedroom.

- AB 98 Violation:** The State of California recently passed **Assembly Bill 98**, establishing a standard safety buffer of **300 to 500 feet** between logistics uses and sensitive receptors (t standards.
- Acute Health Risk:** My children play in the front yard directly facing this intersection. The "Right Turn Only" lane creates a concentrated "plume" of **Diesel Particulate Matter (DPM)** increases their risk of respiratory damage.
- The Demand:** You cannot make a finding of "No Significant Impact" without a site-specific **Health Risk Assessment (HRA)** that quantifies the cancer risk to children from this specifi

- 3. Inconsistency with City Precedent (The "Struck Ave" Standard)** When this same developer (Rexford) built the project at **534 Struck Avenue**, this Commission wisely restricted opera
 - The Conflict:** The applicant is currently requesting **24/7 operations** (via CUP) for Glassell, despite this site being *closer* to homes than Struck Avenue.
 - The Demand:** It would be arbitrary and capricious to grant 24/7 hours here when precedent dictates a 10:00 PM curfew for similar residential interfaces.

- 4. Traffic Safety: The "Trapped" Neighborhood** Residents already experience significant delays making a left turn from Fletcher onto Glassell. Adding a fleet of slow-accelerating trucks to

- 5. Enforcement Loophole: Owner Liability** Residents are concerned that the developer will evade responsibility for noise, dust, and operational violations by blaming transient entities.

- The Demand:** We request a specific Condition of Approval stating: *"The Property Owner (Rexford Industrial) shall be jointly and severally liable for all code enforcement violations, p*

- 6. The "Sound Mirror" & Dead Zone Effect** The proposed **45-foot high concrete wall** is sited aggressively close to the street (Fletcher Ave). This design creates two critical flaws:

- Acoustic Reflection:** A hard, 45-foot vertical surface will act as a "sound mirror," reflecting engine noise and street sounds directly back into the residential homes across the street,
- Urban Dead Zone:** Replacing a green buffer of mature trees with a looming concrete canyon creates a dangerous "dead zone" on Fletcher Avenue that invites graffiti and blight while

My Request to the Commission: I ask that you **CONTINUE** this item and direct the applicant to return with a redesigned project that includes:

- 1. A 10:00 PM – 7:00 AM Curfew** (matching the Struck Ave precedent).

2. **A Health Risk Assessment** quantifying the risk of the "Right Turn Only" idling queue to local children.
3. **A Vegetative Restoration Plan** replacing all 43 removed trees with 36-inch box specimens to prevent the "Sound Mirror" effect.
4. **Owner Liability Clause** ensuring Rexford is accountable for contractors and tenants.

I look forward to your written response regarding these requests.

Respectfully,

Kevin Neu Homeowner, 2489 N Hartman Street
